| Resilience in UAV swarms explanation. | | |
| 4 Motivation for choosing UAV Swarms as the topic. 5 Research Objectives. 6 Objective I: Motivation for U-SMART. 7 System model for U-SMART. 8 Novel metrics for U-SMART. 9 Feasibility test description and simulation parameters. 10 Performance limitations introduced in simulation. 11 Test design for U-SMART. 12 Results for 5 agents using U-SMART. 13 Results for 5 agents using U-SMART. 14 Results for lostHBS metric across various tests. 15 Results for 5 agent VPL test in U-SMART. 16 Results for 5 agent VPL test in U-SMART. 17 VPL results for all tests. 18 Creation of Proximity sensor array. 19 5 agent test for LAV. 20 Results for proximity sensor readings. 21 Results of LAV decision. 22 Results of LAV decision. 23 Influence of APF on Swarm Cohesion metric. 24 5 agent test for task and energy. 25 5 agent test for task and energy. 26 Combined results showing all metrics for U-SMART. 27 Security of agents using U-SAMRT. 28 Objective 1 Conclusions. 29 Research Objective slide. 30 Objective 2-Motivation 31 SS-SAR workflow. 33 Features and benefits of SS-SAR. 34 Maps used. 35 Experiment outline. 36 Pose check in real world map. 37 Pose check in real world map. 38 Dose check in simulation outdoor map. 39 Observations based on D2D framework. 40 Combined results for SS-SAR framework. | 3 | |
| 6 Objective 1: Motivation for U-SMART. 7 System model for U-SMART. 8 Novel metrics for U-SMART. 9 Feasibility test description and simulation parameters. 10 Performance limitations introduced in simulation. 11 Test design for U-SMART. 12 Results for 5 agents using U-SMART. 13 Results for 50 agents using U-SMART. 14 Results for 10stHBS metric across various tests. 15 Results for 5 agent VPL test in U-SMART. 16 Results for 5 agent VPL test in U-SMART. 17 VPL results for all tests. 18 Creation of Proximity sensor array. 19 5 agent test for LAV. 20 Results for proximity sensor readings. 21 Results of LAV decision. 22 Results of LAV, GAV and APF decision. 23 Influence of APF on Swarm Cohesion metric. 24 5 agent test for task and energy. 25 5 agent test for task and energy. 26 Combined results showing all metrics for U-SMART. 27 Security of agents using U-SAMRT. 28 Objective 1 Conclusions. 29 Research Objective slide. 30 Objective 2- Motivation 31 SS-SAR workflow. 32 Pose check/conditional statements. 33 Features and benefits of SS-SAR. 34 Maps used. 35 Experiment outline. 36 Pose check in maps. 37 Pose check in real world map. 38 Observations based on D2D framework. 40 Combined results of SS-SAR framework. 41 Objective 2- Conclusions | 4 | ± |
| 6 Objective 1: Motivation for U-SMART. 7 System model for U-SMART. 8 Novel metrics for U-SMART. 9 Feasibility test description and simulation parameters. 10 Performance limitations introduced in simulation. 11 Test design for U-SMART. 12 Results for 5 agents using U-SMART. 13 Results for 50 agents using U-SMART. 14 Results for 10stHBS metric across various tests. 15 Results for 5 agent VPL test in U-SMART. 16 Results for 5 agent VPL test in U-SMART. 17 VPL results for all tests. 18 Creation of Proximity sensor array. 19 5 agent test for LAV. 20 Results for proximity sensor readings. 21 Results of LAV decision. 22 Results of LAV, GAV and APF decision. 23 Influence of APF on Swarm Cohesion metric. 24 5 agent test for task and energy. 25 5 agent test for task and energy. 26 Combined results showing all metrics for U-SMART. 27 Security of agents using U-SAMRT. 28 Objective 1 Conclusions. 29 Research Objective slide. 30 Objective 2- Motivation 31 SS-SAR workflow. 32 Pose check/conditional statements. 33 Features and benefits of SS-SAR. 34 Maps used. 35 Experiment outline. 36 Pose check in maps. 37 Pose check in real world map. 38 Observations based on D2D framework. 40 Combined results of SS-SAR framework. 41 Objective 2- Conclusions | 5 | |
| 7 System model for U-SMART. 8 Novel metrics for U-SMART. 9 Feasibility test description and simulation parameters. 10 Performance limitations introduced in simulation. 11 Test design for U-SMART. 12 Results for 5 agents using U-SMART. 13 Results for 50 agents using U-SMART. 14 Results for 10 stHBS metric across various tests. 15 Results for 5 agent VPL test in U-SMART. 16 Results for 5 agent VPL test in U-SMART — Continued 17 VPL results for all tests. 18 Creation of Proximity sensor array. 19 5 agent test for LAV. 20 Results for proximity sensor readings. 21 Results of LAV decision. 22 Results of LAV, GAV and APF decision. 23 Influence of APF on Swarm Cohesion metric. 24 5 agent test for task and energy. 25 5 agent test for task and energy. 26 Combined results showing all metrics for U-SMART. 27 Security of agents using U-SAMRT. 28 Objective 1 Conclusions. 29 Research Objective slide. 30 Objective 2- Motivation 31 SS-SAR workflow. 32 Pose check/conditional statements. 33 Features and benefits of SS-SAR. 34 Maps used. 35 Experiment outline. 36 Pose check in maps. 37 Pose check in real world map. 38 Pose check in real world map. 39 Observations based on D2D framework. 40 Combined results for SS-SAR framework. 41 Objective 2- Conclusions | | / |
| 8 Novel metrics for U-SMART. 9 Feasibility test description and simulation parameters. 10 Performance limitations introduced in simulation. 11 Test design for U-SMART. 12 Results for 5 agents using U-SMART. 13 Results for 50 agents using U-SMART. 14 Results for 5 agent VPL test in U-SMART. 15 Results for 5 agent VPL test in U-SMART. 16 Results for 5 agent VPL test in U-SMART – Continued 17 VPL results for all tests. 18 Creation of Proximity sensor array. 19 5 agent test for LAV. 20 Results for proximity sensor readings. 21 Results of LAV decision. 22 Results of LAV GAV and APF decision. 23 Influence of APF on Swarm Cohesion metric. 24 5 agent test for task and energy. 25 5 agent test for task and energy. 26 Combined results showing all metrics for U-SMART. 27 Security of agents using U-SAMRT. 28 Objective 1 Conclusions. 29 Research Objective slide. 30 Objective 2- Motivation 31 SS-SAR workflow. 32 Pose check/conditional statements. 33 Features and benefits of SS-SAR. 34 Maps used. 35 Experiment outline. 36 Pose check in maps. 37 Pose check in real world map. 38 Pose check in real world map. 40 Combined results for SS-SAR framework. 41 Objective 2- Conclusions | | , |
| 10 Performance limitations introduced in simulation. 11 Test design for U-SMART. 12 Results for 5 agents using U-SMART. 13 Results for 50 agents using U-SMART. 14 Results for lostHBS metric across various tests. 15 Results for 5 agent VPL test in U-SMART. 16 Results for 5 agent VPL test in U-SMART. 17 VPL results for all tests. 18 Creation of Proximity sensor array. 19 5 agent test for LAV. 20 Results for proximity sensor readings. 21 Results of LAV decision. 22 Results of LAV, GAV and APF decision. 23 Influence of APF on Swarm Cohesion metric. 24 5 agent test for task and energy. 25 5 agent test for task and energy. 26 Combined results showing all metrics for U-SMART. 27 Security of agents using U-SAMRT. 28 Objective 1 Conclusions. 29 Research Objective slide. 30 Objective 2- Motivation 31 SS-SAR workflow. 32 Pose check/conditional statements. 33 Features and benefits of SS-SAR. 34 Maps used. 35 Experiment outline. 36 Pose check in real world map. 37 Pose check in real world map. 38 Pose check in real world map. 39 Observations based on D2D framework. 40 Combined results for SS-SAR framework. 41 Objective 2- Conclusions | | Novel metrics for U-SMART. |
| 10 Performance limitations introduced in simulation. 11 Test design for U-SMART. 12 Results for 5 agents using U-SMART. 13 Results for 50 agents using U-SMART. 14 Results for lostHBS metric across various tests. 15 Results for 5 agent VPL test in U-SMART. 16 Results for 5 agent VPL test in U-SMART. 17 VPL results for all tests. 18 Creation of Proximity sensor array. 19 5 agent test for LAV. 20 Results for proximity sensor readings. 21 Results of LAV decision. 22 Results of LAV decision. 23 Influence of APF on Swarm Cohesion metric. 24 5 agent test for task and energy. 25 5 agent test for task and energy. 26 Combined results showing all metrics for U-SMART. 27 Security of agents using U-SAMRT. 28 Objective 1 Conclusions. 29 Research Objective slide. 30 Objective 2- Motivation 31 SS-SAR workflow. 32 Pose check/conditional statements. 33 Features and benefits of SS-SAR. 34 Maps used. 35 Experiment outline. 36 Pose check in real world map. 37 Pose check in real world map. 38 Pose check in simulation outdoor map. 40 Objective 2- Conclusions | 9 | Feasibility test description and simulation parameters. |
| 11 Test design for U-SMART. 12 Results for 5 agents using U-SMART. 13 Results for 50 agents using U-SMART. 14 Results for 50 agents using U-SMART. 15 Results for 5 agent VPL test in U-SMART. 16 Results for 5 agent VPL test in U-SMART. 16 Results for 5 agent VPL test in U-SMART. 17 VPL results for all tests. 18 Creation of Proximity sensor array. 19 5 agent test for LAV. 20 Results for proximity sensor readings. 21 Results of LAV decision. 22 Results of LAV, GAV and APF decision. 23 Influence of APF on Swarm Cohesion metric. 24 5 agent test for task and energy. 25 5 agent test for task and energy. 26 Combined results showing all metrics for U-SMART. 27 Security of agents using U-SAMRT. 28 Objective 1 Conclusions. 29 Research Objective slide. 30 Objective 2-Motivation 31 SS-SAR workflow. 32 Pose check/conditional statements. 33 Features and benefits of SS-SAR. 34 Maps used. 35 Experiment outline. 36 Pose check in real world map. 37 Pose check in real world map. 38 Pose check in simulation outdoor map. 40 Combined results for SS-SAR framework. 41 Objective 2- Conclusions. | 10 | Performance limitations introduced in simulation. |
| 13 Results for 50 agents using U-SMART. 14 Results for lostHBS metric across various tests. 15 Results for 5 agent VPL test in U-SMART. 16 Results for 5 agent VPL test in U-SMART – Continued 17 VPL results for all tests. 18 Creation of Proximity sensor array. 19 5 agent test for LAV. 20 Results for proximity sensor readings. 21 Results of LAV decision. 22 Results of LAV, GAV and APF decision. 23 Influence of APF on Swarm Cohesion metric. 24 5 agent test for task and energy. 25 5 agent test for task and energy. 26 Combined results showing all metrics for U-SMART. 27 Security of agents using U-SAMRT. 28 Objective 1 Conclusions. 29 Research Objective slide. 30 Objective 2- Motivation 31 SS-SAR workflow. 32 Pose check/conditional statements. 33 Features and benefits of SS-SAR. 34 Maps used. 35 Experiment outline. 36 Pose check in real world map. 37 Pose check in simulation outdoor map. 38 Pose check in simulation outdoor map. 39 Observations based on D2D framework. 40 Combined results for SS-SAR framework. 41 Objective 2- Conclusions | 11 | |
| 14 Results for lostHBS metric across various tests. 15 Results for 5 agent VPL test in U-SMART. 16 Results for 5 agent VPL test in U-SMART – Continued 17 VPL results for all tests. 18 Creation of Proximity sensor array. 19 5 agent test for LAV. 20 Results for proximity sensor readings. 21 Results of LAV decision. 22 Results of LAV, GAV and APF decision. 23 Influence of APF on Swarm Cohesion metric. 24 5 agent test for task and energy. 25 5 agent test for task and energy. 26 Combined results showing all metrics for U-SMART. 27 Security of agents using U-SAMRT. 28 Objective 1 Conclusions. 29 Research Objective slide. 30 Objective 2- Motivation 31 SS-SAR workflow. 32 Pose check/conditional statements. 33 Features and benefits of SS-SAR. 34 Maps used. 35 Experiment outline. 36 Pose check in maps. 37 Pose check in real world map. 38 Pose check in simulation outdoor map. 39 Observations based on D2D framework. 40 Combined results for SS-SAR framework. 41 Objective 2- Conclusions | 12 | Results for 5 agents using U-SMART. |
| 14 Results for lostHBS metric across various tests. 15 Results for 5 agent VPL test in U-SMART. 16 Results for 5 agent VPL test in U-SMART – Continued 17 VPL results for all tests. 18 Creation of Proximity sensor array. 19 5 agent test for LAV. 20 Results for proximity sensor readings. 21 Results of LAV decision. 22 Results of LAV, GAV and APF decision. 23 Influence of APF on Swarm Cohesion metric. 24 5 agent test for task and energy. 25 5 agent test for task and energy. 26 Combined results showing all metrics for U-SMART. 27 Security of agents using U-SAMRT. 28 Objective 1 Conclusions. 29 Research Objective slide. 30 Objective 2- Motivation 31 SS-SAR workflow. 32 Pose check/conditional statements. 33 Features and benefits of SS-SAR. 34 Maps used. 35 Experiment outline. 36 Pose check in maps. 37 Pose check in real world map. 38 Pose check in simulation outdoor map. 39 Observations based on D2D framework. 40 Combined results for SS-SAR framework. 41 Objective 2- Conclusions | 13 | Results for 50 agents using U-SMART. |
| 16 Results for 5 agent VPL test in U-SMART – Continued 17 VPL results for all tests. 18 Creation of Proximity sensor array. 19 5 agent test for LAV. 20 Results for proximity sensor readings. 21 Results of LAV decision. 22 Results of LAV, GAV and APF decision. 23 Influence of APF on Swarm Cohesion metric. 24 5 agent test for task and energy. 25 5 agent test for task and energy. 26 Combined results showing all metrics for U-SMART. 27 Security of agents using U-SAMRT. 28 Objective 1 Conclusions. 29 Research Objective slide. 30 Objective 2- Motivation 31 SS-SAR workflow. 32 Pose check/conditional statements. 33 Features and benefits of SS-SAR. 34 Maps used. 35 Experiment outline. 36 Pose check in maps. 37 Pose check in real world map. 38 Pose check in simulation outdoor map. 39 Observations based on D2D framework. 40 Combined results for SS-SAR framework. 41 Objective 2- Conclusions | 14 | |
| 16 Results for 5 agent VPL test in U-SMART – Continued 17 VPL results for all tests. 18 Creation of Proximity sensor array. 19 5 agent test for LAV. 20 Results for proximity sensor readings. 21 Results of LAV decision. 22 Results of LAV, GAV and APF decision. 23 Influence of APF on Swarm Cohesion metric. 24 5 agent test for task and energy. 25 5 agent test for task and energy. 26 Combined results showing all metrics for U-SMART. 27 Security of agents using U-SAMRT. 28 Objective 1 Conclusions. 29 Research Objective slide. 30 Objective 2- Motivation 31 SS-SAR workflow. 32 Pose check/conditional statements. 33 Features and benefits of SS-SAR. 34 Maps used. 35 Experiment outline. 36 Pose check in maps. 37 Pose check in real world map. 38 Pose check in simulation outdoor map. 39 Observations based on D2D framework. 40 Combined results for SS-SAR framework. 41 Objective 2- Conclusions | 15 | Results for 5 agent VPL test in U-SMART. |
| 18 Creation of Proximity sensor array. 19 5 agent test for LAV. 20 Results for proximity sensor readings. 21 Results of LAV decision. 22 Results of LAV, GAV and APF decision. 23 Influence of APF on Swarm Cohesion metric. 24 5 agent test for task and energy. 25 5 agent test for task and energy. 26 Combined results showing all metrics for U-SMART. 27 Security of agents using U-SAMRT. 28 Objective 1 Conclusions. 29 Research Objective slide. 30 Objective 2- Motivation 31 SS-SAR workflow. 32 Pose check/conditional statements. 33 Features and benefits of SS-SAR. 34 Maps used. 35 Experiment outline. 36 Pose check in maps. 37 Pose check in real world map. 38 Pose check in simulation outdoor map. 39 Observations based on D2D framework. 40 Combined results for SS-SAR framework. | 16 | |
| 19 | 17 | VPL results for all tests. |
| 20 Results for proximity sensor readings. 21 Results of LAV decision. 22 Results of LAV, GAV and APF decision. 23 Influence of APF on Swarm Cohesion metric. 24 5 agent test for task and energy. 25 5 agent test for task and energy. 26 Combined results showing all metrics for U-SMART. 27 Security of agents using U-SAMRT. 28 Objective 1 Conclusions. 29 Research Objective slide. 30 Objective 2- Motivation 31 SS-SAR workflow. 32 Pose check/conditional statements. 33 Features and benefits of SS-SAR. 34 Maps used. 35 Experiment outline. 36 Pose check in maps. 37 Pose check in real world map. 38 Pose check in simulation outdoor map. 39 Observations based on D2D framework. 40 Combined results for SS-SAR framework. 41 Objective 2- Conclusions | 18 | Creation of Proximity sensor array. |
| 21 Results of LAV decision. 22 Results of LAV, GAV and APF decision. 23 Influence of APF on Swarm Cohesion metric. 24 5 agent test for task and energy. 25 5 agent test for task and energy. 26 Combined results showing all metrics for U-SMART. 27 Security of agents using U-SAMRT. 28 Objective 1 Conclusions. 29 Research Objective slide. 30 Objective 2- Motivation 31 SS-SAR workflow. 32 Pose check/conditional statements. 33 Features and benefits of SS-SAR. 34 Maps used. 35 Experiment outline. 36 Pose check in maps. 37 Pose check in real world map. 38 Pose check in simulation outdoor map. 39 Observations based on D2D framework. 40 Combined results for SS-SAR framework. 41 Objective 2- Conclusions | 19 | 5 agent test for LAV. |
| 22 Results of LAV, GAV and APF decision. 23 Influence of APF on Swarm Cohesion metric. 24 5 agent test for task and energy. 25 5 agent test for task and energy. 26 Combined results showing all metrics for U-SMART. 27 Security of agents using U-SAMRT. 28 Objective 1 Conclusions. 29 Research Objective slide. 30 Objective 2- Motivation 31 SS-SAR workflow. 32 Pose check/conditional statements. 33 Features and benefits of SS-SAR. 34 Maps used. 35 Experiment outline. 36 Pose check in maps. 37 Pose check in real world map. 38 Pose check in simulation outdoor map. 39 Observations based on D2D framework. 40 Combined results for SS-SAR framework. 41 Objective 2- Conclusions | 20 | Results for proximity sensor readings. |
| 23 Influence of APF on Swarm Cohesion metric. 24 5 agent test for task and energy. 25 5 agent test for task and energy. 26 Combined results showing all metrics for U-SMART. 27 Security of agents using U-SAMRT. 28 Objective 1 Conclusions. 29 Research Objective slide. 30 Objective 2- Motivation 31 SS-SAR workflow. 32 Pose check/conditional statements. 33 Features and benefits of SS-SAR. 34 Maps used. 35 Experiment outline. 36 Pose check in maps. 37 Pose check in real world map. 38 Pose check in simulation outdoor map. 39 Observations based on D2D framework. 40 Combined results for SS-SAR framework. 41 Objective 2- Conclusions | 21 | Results of LAV decision. |
| 5 agent test for task and energy. 5 agent test for task and energy. Combined results showing all metrics for U-SMART. Security of agents using U-SAMRT. Objective 1 Conclusions. Research Objective slide. Objective 2- Motivation SS-SAR workflow. SS-SAR workflow. Pose check/conditional statements. Heatures and benefits of SS-SAR. Maps used. Experiment outline. Pose check in maps. Pose check in real world map. Pose check in simulation outdoor map. Observations based on D2D framework. Combined results for SS-SAR framework. | 22 | Results of LAV, GAV and APF decision. |
| 25 5 agent test for task and energy. 26 Combined results showing all metrics for U-SMART. 27 Security of agents using U-SAMRT. 28 Objective 1 Conclusions. 29 Research Objective slide. 30 Objective 2- Motivation 31 SS-SAR workflow. 32 Pose check/conditional statements. 33 Features and benefits of SS-SAR. 34 Maps used. 35 Experiment outline. 36 Pose check in maps. 37 Pose check in real world map. 38 Pose check in simulation outdoor map. 39 Observations based on D2D framework. 40 Combined results for SS-SAR framework. 41 Objective 2- Conclusions | 23 | Influence of APF on Swarm Cohesion metric. |
| 26 Combined results showing all metrics for U-SMART. 27 Security of agents using U-SAMRT. 28 Objective 1 Conclusions. 29 Research Objective slide. 30 Objective 2- Motivation 31 SS-SAR workflow. 32 Pose check/conditional statements. 33 Features and benefits of SS-SAR. 34 Maps used. 35 Experiment outline. 36 Pose check in maps. 37 Pose check in real world map. 38 Pose check in simulation outdoor map. 39 Observations based on D2D framework. 40 Combined results for SS-SAR framework. 41 Objective 2- Conclusions | 24 | 5 agent test for task and energy. |
| 27 Security of agents using U-SAMRT. 28 Objective 1 Conclusions. 29 Research Objective slide. 30 Objective 2- Motivation 31 SS-SAR workflow. 32 Pose check/conditional statements. 33 Features and benefits of SS-SAR. 34 Maps used. 35 Experiment outline. 36 Pose check in maps. 37 Pose check in real world map. 38 Pose check in simulation outdoor map. 39 Observations based on D2D framework. 40 Combined results for SS-SAR framework. 41 Objective 2- Conclusions | 25 | 5 agent test for task and energy. |
| 28 Objective 1 Conclusions. 29 Research Objective slide. 30 Objective 2- Motivation 31 SS-SAR workflow. 32 Pose check/conditional statements. 33 Features and benefits of SS-SAR. 34 Maps used. 35 Experiment outline. 36 Pose check in maps. 37 Pose check in real world map. 38 Pose check in simulation outdoor map. 39 Observations based on D2D framework. 40 Combined results for SS-SAR framework. 41 Objective 2- Conclusions | 26 | Combined results showing all metrics for U-SMART. |
| 29 Research Objective slide. 30 Objective 2- Motivation 31 SS-SAR workflow. 32 Pose check/conditional statements. 33 Features and benefits of SS-SAR. 34 Maps used. 35 Experiment outline. 36 Pose check in maps. 37 Pose check in real world map. 38 Pose check in simulation outdoor map. 39 Observations based on D2D framework. 40 Combined results for SS-SAR framework. 41 Objective 2- Conclusions | 27 | Security of agents using U-SAMRT. |
| 30 Objective 2- Motivation 31 SS-SAR workflow. 32 Pose check/conditional statements. 33 Features and benefits of SS-SAR. 34 Maps used. 35 Experiment outline. 36 Pose check in maps. 37 Pose check in real world map. 38 Pose check in simulation outdoor map. 39 Observations based on D2D framework. 40 Combined results for SS-SAR framework. 41 Objective 2- Conclusions | 28 | Objective 1 Conclusions. |
| 31 SS-SAR workflow. 32 Pose check/conditional statements. 33 Features and benefits of SS-SAR. 34 Maps used. 35 Experiment outline. 36 Pose check in maps. 37 Pose check in real world map. 38 Pose check in simulation outdoor map. 39 Observations based on D2D framework. 40 Combined results for SS-SAR framework. 41 Objective 2- Conclusions | | Research Objective slide. |
| 32 Pose check/conditional statements. 33 Features and benefits of SS-SAR. 34 Maps used. 35 Experiment outline. 36 Pose check in maps. 37 Pose check in real world map. 38 Pose check in simulation outdoor map. 39 Observations based on D2D framework. 40 Combined results for SS-SAR framework. 41 Objective 2- Conclusions | 30 | Objective 2- Motivation |
| 33 Features and benefits of SS-SAR. 34 Maps used. 35 Experiment outline. 36 Pose check in maps. 37 Pose check in real world map. 38 Pose check in simulation outdoor map. 39 Observations based on D2D framework. 40 Combined results for SS-SAR framework. 41 Objective 2- Conclusions | 31 | |

|----|----------------------------------------------------------|
| 44 | Objective 3: Motivation |
| 45 | Objective title slide |
| 46 | Why is simulation important? |
| 47 | Bibliometric analysis of Simulation of UAV swarms |
| 48 | Disruption shortcomings. |
| 49 | Examine and Enhance. |
| 50 | Methods for disruption generation. |
| 51 | Major and minor disruptions programmed. |
| 52 | 2D based wind grid. |
| 53 | Value based obstacle geometry. |
| 54 | Static PEWFG. |
| 55 | Simulation pipeline 1. |
| 56 | Bridge and 3D obstacle interaction grids. |
| 57 | Results of simulation. |
| 58 | Flow around turbine. |
| 59 | Induced airflow graphic. |
| 60 | Results for 2D grid. |
| 61 | ASOS data viz. |
| 62 | Wind tunnel for single agents. |
| 63 | Energy consumption changes. |
| 64 | Effect of induced airflow on agents. |
| 65 | Disruption modeling shortcoming slide. |
| 66 | 2D fragmentation. |
| 67 | Obstacle modeling. |
| 68 | Effects of obstacles and turbulence on critical metrics. |
| 69 | Design of 3D grid. |
| 70 | Dispersion in 3D grid scenario. |
| 71 | Obstacle encounter rates for 3D world. |
| 72 | Combined results for Swarm Cohesion metric. |
| 73 | Examine additional disruptions. |
| 74 | Objective 3: Conclusions |
| 75 | Dissertation Conclusion |
| 76 | Results of using hetero-agents. |
| 77 | Results of using hetero-agents. |
| 78 | Research Publications. |
| 79 | Dissertation supporting publications. |
